- The surface must be free of dust, dirt, and debris.
- The surface must be dry and free of moisture.
- The surface must be free of oil, grease, and other contaminants.
- The surface must be free of sharp edges and corners.
- The surface must be free of any other materials that may interfere with the installation.

How to Find a Good Lawyer

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
2. Next, gather relevant information and data. This may involve research, consultation with experts, or collecting data from various sources.
3. Once the information is gathered, it is important to analyze it carefully. This involves identifying patterns, trends, and potential solutions.
4. After analysis, a plan should be developed. This plan should outline the steps that need to be taken to solve the problem or answer the question.
5. Finally, the plan should be implemented. This involves carrying out the steps outlined in the plan and monitoring progress along the way.
